

The simple ideas are usually the best. The problem with this idea is IF the career politicians decide to add it to our existing tax code. Career politicians seek to complicate the code. Give me six (years) to see what I can fix.

Not being a career politician, I would submit a bill requiring the legislature that any tax proposed be coupled with the repeal of taxes of equal value. The apt tax could repeal many taxes while simplifying the code and creating a pro business growth environment.

This tax would also solve many tax collection issues we have with the Oneida Indian Nation because they use banks here or abroad. Either way, they would have large and many transactions we could collect locally or through foreign exchanges if using off shore banking. We would not have to bother with the other taxes we refuse to collect having been eliminated with the apt tax. (i.e. gas, property & cigarette taxes)

It is estimated that our property taxes in Madison County are inflated 20-25% because our governor refuses to collect the taxes that he is obligated to collect by law.
